PROFILE SUMMARY

Specify the roll DevOps & AI Engineering fresher skilled in of Agentic AI,Gen AI,Python, Java, Git, GitHub, Docker, Kubernetes, Jenkins, GitHub Actions, and n8n. Familiar with Azure (AKS) , AWS (EC2, S3, CloudWatch), Prometheus, Grafana, Gitleaks, and Strivy. Knowledge of FastAPI, REST APIs, LLMs, chatbots, and AI automation.focused on building practical technology solutions. Strong in problem-solving, automation, CI/CD, and software development.

EDUCATION

Dhaanish Ahmed Institute of Technology — **2027 (Ongoing)**
Bachelor of Technology - Artificial Intelligence and Data Science — **8.03 CGPA**

St.antony's higher Secondary School,nagapattinam — **2023**
Higher Secondary Education. — **60%**

Modern matriculation higher Secondary School,nagore — **2021**
Senior Secondary Education. — **100.0%**

SKILLS

- Programming: Python, Java,Javascript, HTML,CSS,YAML,Typescript
- AI & Data Science: Agentic AI,Gen AI,Data Analysis, Data Collection, Data Cleaning, SQL Queries
- Tools: n8n ,Git , GitHub ,Github action ,Docker,Kubernetes ,Jenkins ,Graffana ,Promethues ,AWS (EC2 ,S3 ,cloudwatch) Gitleaks & Strivy
- Soft Skills: Communication, Team Lead,Team work, Analytical Thinking, Time Management

PROJECT

FormLaw – Agentic AI-Powered Legal Intelligence & Case Management Platform | Link — **Aug 2026**

- Built a legal platform for client-advocate collaboration and case management.
- Designed multi-agent workflows for legal research, case analysis, and evidence review.
- Developed RAG-based legal document analysis with source-grounded citations.
- Designed secure AI workflows with RBAC, human approval, and audit logging.

Tech stack: Python, FastAPI, React/Next.js, TypeScript, PostgreSQL, pgvector, LangGraph, LLMs, RAG.

EXPERIENCE AND ACHIEVEMENTS

Team Lead - Hackathon Project:(BusJao) Real-Time Public Transport Tracking for Small Cities | link — **Nov 2025**

- Collaborated in a 5-member team to develop a public transport tracking solution for small cities.
- Collected, organized, and prepared transportation data for project analysis.
- Supported data-driven decision making by structuring collected information for further analysis.

SmartAutoFlex (DevOps & AI integration) — **Dec 2025**

- Founded SmartAutoFlex, an AI automation startup for businesses.
- Built AI chatbots and voice agents for customer support and bookings.
- Developed automation workflows using n8n, FastAPI, and AI tools.

Tech stack: Python, FastAPI, Next.js, React, TypeScript, PostgreSQL, OpenAI API, n8n, REST APIs, Docker, Git, GitHub and AWS.

CERTIFICATIONS

- Joy of Python – Python Programming | Hope Foundation. — **May 2023**
- SQL & Database Fundamentals – SQL, PostgreSQL . — **Feb 2025**
- REST API Development – FastAPI / API Development. — **Jan 2026**
